After about 10 days of being held in a small
cage the bird was very tame and would
eat from my hand. It was a large bird
about 12 inches long with a long tail.
The upper parts were dark brown,
the lower parts were yellowish green.
The wings were dark brown with a
yellowish green patch on the outer edge.
The tail was long and deeply forked.
The legs were long and strong.
The beak was strong and slightly curved.
The bird was very active and would fly
short distances at a time.
