Dear Property Owner/Resident,

The Texas Department of Transportation (TxDOT) is providing this notice to inform you of upcoming construction activity along FM 806 in your area.

TxDOT's contractor is scheduled to begin reconstruction of the FM 806 bridge located just south of Oak Hill Drive. Construction is expected to begin mid-May (tentatively May 26th) and will continue for approximately **5 months**. During this period, **FM 806 will be closed to traffic just south of Oak Hill Drive.**

We apologize for the inconvenience this closure may cause. Due to the narrow right of way and the nature of the bridge work, a full roadway closure is the safest and most efficient method to complete the project. TxDOT recognizes that this work overlaps with nearby IH-10 construction and appreciates your patience as these projects move forward.

Bridge Location (GPS):

29.687783, -96.561480

TxDOT greatly appreciates your cooperation as we work to improve mobility and safety along FM 806 and the I-10 corridor. If you have questions or would like additional information, please contact **the local TxDOT office at 979-532-3143.**

Sincerely,

Texas Department of Transportation
