

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

NOTICE OF A PROPOSED AMENDMENT OF GENERAL PERMIT TXG670000 AUTHORIZING THE DISCHARGE OF WASTEWATER

The Texas Commission on Environmental Quality (TCEQ or commission) is proposing to amend (without renewal) Texas Pollutant Discharge Elimination System General Permit TXG670000. This general permit authorizes the discharge of hydrostatic test water from new vessels; existing vessels which contained raw water, potable water, or elemental gases; or existing vessels which contained petroleum substances or waste related to petroleum substances. The draft general permit applies to the entire state of Texas. General permits are authorized by Texas Water Code, §26.040.

DRAFT GENERAL PERMIT. The executive director has prepared a draft general permit amendment of the existing general permit. The permit amendments will allow discharges of hydrostatic test water from new and existing vessels into water in the state from crude oil and natural gas exploration, development, and production operations to be eligible for authorization under the general permit upon the TCEQ receiving approval from the U.S. Environmental Protection Agency (EPA) to regulate these activities under the Texas Pollutant Discharge Elimination System. Until such time, these entities would continue to be required to obtain authorization to discharge from both the EPA and RRC. No significant degradation of high quality waters is expected and existing uses will be maintained and protected. The executive director proposes to require certain dischargers, including discharges of hydrostatic test water from crude oil and natural gas exploration, development, and production operations, to submit a Notice of Intent to obtain authorization to discharge.

The executive director has reviewed this action for consistency with the goals and policies of the Texas Coastal Management Program (CMP) according to General Land Office regulations and has determined that the action is consistent with applicable CMP goals and policies.
